

calcium ion-binding
 RNA polymerase II cis-regulatory region sequence-specific DNA binding
 transcription regulatory region sequence-specific DNA binding
 binding transcription factor activity, RNA polymerase II-specific
 hydrolase activity, acting on ester bonds
 catalytic activity, acting on a nucleic acid
 protein dimerization activity
 catalytic activity, acting on RNA
 cytoskeletal protein binding
 enzyme regulator activity
 acyltransferase activity
 serine-type endopeptidase activity
 pyrophosphatase activity
 ATP-dependent hydrolase activity
 hydrolase activity, acting on acid anhydrides, in phosphorus-containing
 ribonucleoside triphosphate
 phosphatase activity
 phosphotransferase activity, alcohol group as acceptor
 transferase activity, transferring phosphorus-containing groups
