transferase activity, transferring phosphorus—containing groups kinase activity
enzyphosphotransferaseyactivity, alcohol groupeaszacceptorling
acyltransferase activity

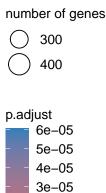

peptidase activity
endopeptidase activity
cytoskeletal protein binding
sequerine typeipeptidase activity
RNA polymerase II cis—regulatory region sequence—type endopeptidase activity
serine—type endopeptidase activity
calcium ion binding cription factor apriotein dimerization activitys
RNA polymerase II transcription regulatory region sequence—s
catalytic activity, acting on RNA

molecular trafallytic activity tacting on a nucleic acid

ATERIOR DESCRIPTION OF A REIGNATURE OF A REIGNATURE

signaling receptor activity

Chromatin binding

2e - 05
